

The Federal Communications Commission

Dear The Federal Communications Commission,

As a small business operator struggling just to keep going
I do not want to pay more for my telephone service! I urge you
to reject a flat fee proposal that would change how
contributions are made to the Universal Service Fund.

----- (The reason I use a pay
as you go cell phone is because I can not afford a "contract
serviced phone") -----

I am concerned that this proposal could make my current service
unaffordable.

Under the flat fee proposal you are considering, people who make
few long distance calls would pay the same as people or
businesses that make many calls. In other words, low-volume and
primarily residential customers would bear the same universal
service fund burden as a high-volume residential or business
customers. This is unfair!

I use my wireless phone for SAFTEY, security and convenience. I
don't want to lose these benefits so that big businesses can pay
less than their fair share. I urge you to reject the proposal to
move the USF collection system to a flat-fee. A tax is a tax,
and can only hurt those who can least afford this increase.

Keep the USF Fair!

Sincerely,

Ed Breunig
